

# How do I replace the RPB Nova3 helmet lenses?

## 1x Inner Blast Lens

1. Always remove the 'green' plastic lens protective sheets before installing.

2. Open the outer green blast helmet frame. Unclip the black inner lens frame and remove it from the helmet. Remove old lens.

3. Place new lens into frame.

4. Click frame back into the helmet.

## Up to 3x 'Tear Off' Shields

5. Place 3 'Tear Off' lenses together ensuring the tab is folded to the inside separately on each lens. This is to prevent pulling all 3 lenses off at once.

6. Remove the used 'Stay Put' lens and the 'Tear Off' lens surrounds from inside of green frame. Place the 3 new 'Tear Off' lenses back into the frame.

*Note: When helmet frame is closed the individual 'Tear Off' tabs appear as shown.*

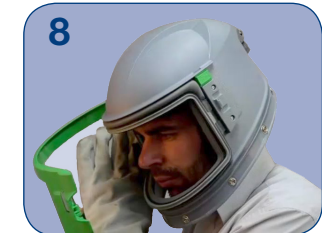

## 1x 'Stay Put' Outer Blast Lens

7. Always remove the 'blue' plastic lens protective sheets before installing.

8. The stay put lens is placed over the 'Tear Off' lenses. Put the left locator end in first then push the other end into place.

9. Close the green frame of your blast helmet. Done! You are ready to continue blasting.
