

# Why use an S-Series Mega-Blaster?

## 17 ways to blast tank floors faster

### Mega-Blaster Features

- Safe industry design; features Blast-One™ normally closed fail-safe valves and controls.
- Designed to provide the industry's lowest pressure drop, resulting in higher productivity.
- Low maintenance design minimizes downtime.
- 150 psi rated vessel; higher pressure systems available.
- Dual ladders allow easy access to closure.
- 10" quick-opening cam lock fill port requires less maintenance and provides for easier loading.
- Rugged yard towable or optional highway rated trailers for ease of transport (not rated for steel abrasives).
- 16" x 12" manway for easy access.
- Full-load lifting eyes for easier transport (not rated for steel abrasives).
- Optional moisture separator for uninterrupted abrasive flow.
- Able to support multiple operators simultaneously.
- Also available as a skid stationary mounted unit.
