

What size whip hose should you use with a 7/16" nozzle?

Recommended hose size chart

Nozzle Size	CFM used @ 100psi	Extension Hose ID	Whiphose ID
7/16" - #7	312	1-1/2"	1-1/4"

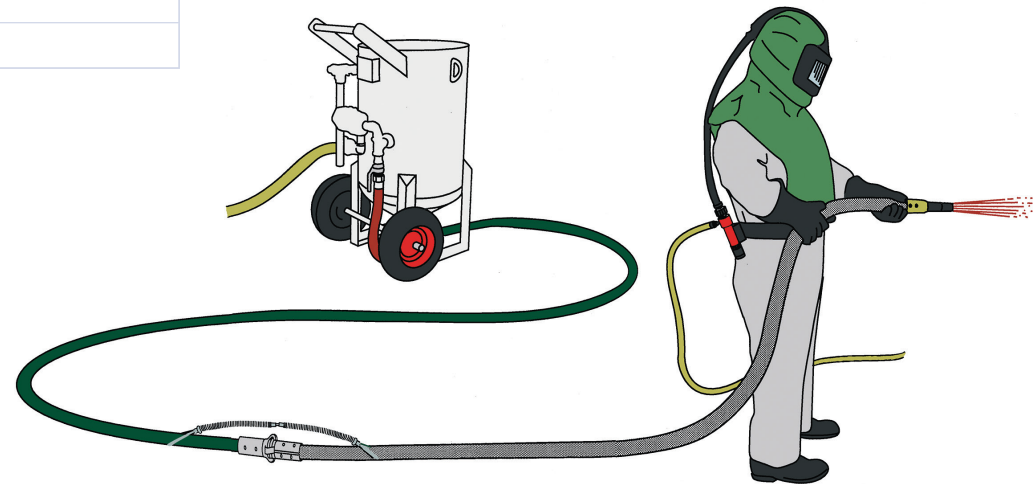

Additional sizes

1/4" - #4	103	1"	3/4"
5/16" - #5	158	1-1/4"	1"
3/8" - #6	229	1-1/2"	1-1/4"
1/2" - #8	407	2"	1-1/2"

Having at least 100psi at the nozzle is a must for blasting contractors. Contractors are running their compressors for 6-8hrs/day, burning diesel at \$7/gallon (it's an expensive operation).

All blasting contractors should take a nozzle pressure reading every day – it's the most accurate health check – and it takes less than one minute!

Have you checked your nozzle pressure today?
