

BLASTECH

**MASTERFIELD
INDUSTRIAL EQUIPMENT**

Eliminate all 'whip' hoses in use today!

3/4" (19MM) AND 1" (25MM) I.D. 'WHIP' HOSES ARE MOST OFTEN THE CAUSE OF THE LARGEST PRESSURE DROPS IN THE ENTIRE BLAST CLEANING SYSTEM

Instead of reducing the I.D. of the hose near the blast nozzle, use the new 1 1/4" (32mm) I.D. "SUPA" hose right up to the blast nozzle holder. This eliminates the reduction in size of the blast hose, will give even more flexibility than the present "whip" hoses, but will hold the pressure drop to the absolute minimum!
