

How do I get the dirt off my shoes and out of my tank?

Sticky Mat

By placing a sticky mat at the entrance of the tanks. Simply wipe your boots on the first mat then step on to the sticky sheets to leave the dirt and dust behind.

Overspray Foot Covers

Use overspray foot covers to protect the floor and keep the dirt on your boots.

Non-marking boots

Wearing non-marking boots eliminates the rubber marks left on the floor from boots.
