

BLASTECH

MASTERFIELD
INDUSTRIAL EQUIPMENT

Three things to do when recycling expendable abrasive

- 1** Keep it absolutely dry. Unless you are using a wet-blast machines, wet abrasive won't recycle
- 2** Recycle in batches. Unless you have a recovery system which automatically collects the spent abrasive and recycles it, it is more efficient to recycle several tonnes at once.
- 3** Use an airwash system to remove the dust properly. Sometimes we see blasters just getting shovel loads of dusty abrasive and shoveling/bucketing it back into the top of the pot. Best practice is to have an airwash to remove this dust before using it to blast again.

**USE YOUR GARNET ABRASIVE
OVER AND OVER AGAIN FOR
MAXIMUM COST SAVINGS!**

Call Blast-One today for advice on recycling your abrasive!
